Project Title : **Hotel Room Booking and Hospitality Management System**

## 2.1. Functional requirements:

1. User Authentication
2. Guest Registration
3. Guest login
4. Receptionist Login
5. Hotel Management Features:
    1. Search available rooms
    2. Book rooms
    3. Cancel reservations
    4. Guest check-in/check-out
6. Dashboard Features:
    1. Customer dashboard
    2. Reception dashboard
    3. Booking management
    4. Billing and invoice generation
    5. Room Service Requests
7. Hotel statistics dashboard

## 2.2. Non functional requirements:

1. Responsive user interface using Bootstrap 5
2. Fast and user-friendly navigation.
3. Secure role-based authentication.
4. Modern luxury-themed interface.
5. Cross-browser compatibility.
6. Easy maintenance and modular code structure.
7. Reusable CSS and JavaScript components.
8. Mobile, tablet, and desktop support

## 2.3. List of AI tools used for building UI(if any):

Gemini

## 2.4. Prompt (if any) :

| Sl. No | Name of the tool | prompts |
|---|---|---|
| 1 | Gemini | Create a responsive Hotel Management System UI using HTML, CSS, JavaScript, and Bootstrap with separate customer and receptionist portals. |
| 2 | Gemini | Design a luxury-themed dashboard with room booking, billing, and hotel management features. |
| 3 | Gemini | Generate modern responsive login, registration, dashboard, and booking pages with role-based access. |

## 2.5. List of files:

HTML files:

1. index.html
2. login.html
3. reception-dashboard.html
4. reception-login.html
5. customer-dashboard.html
6. customer-login.html
7. register.html
8. unauthorized.html

CSS file:

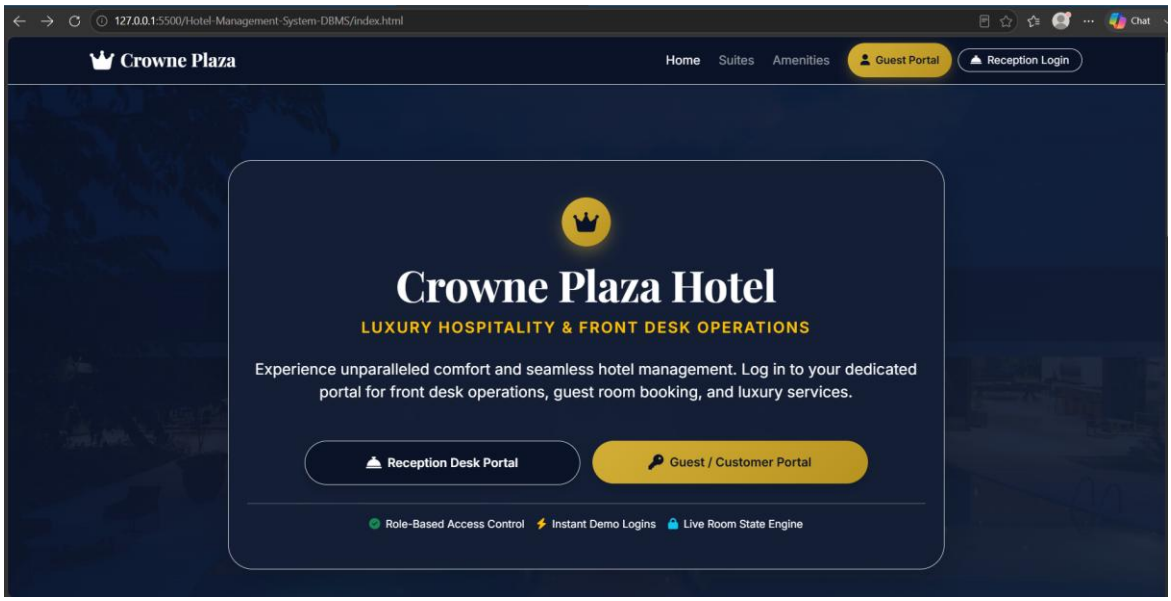

style.css

JavaScript files:

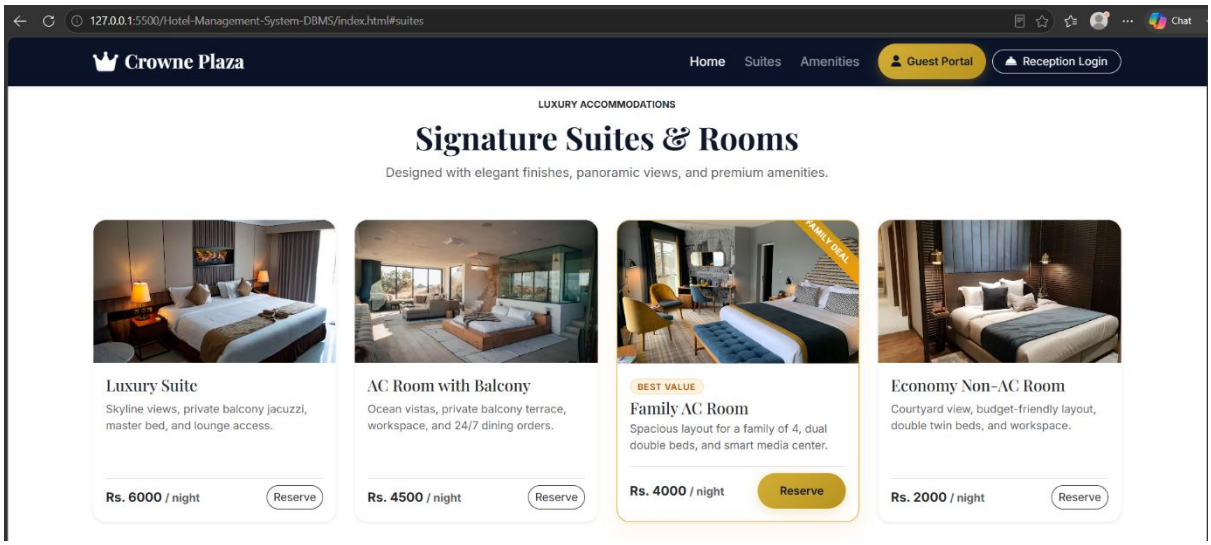

1. data.js
2. auth.js

## 2.6. UI Screenshot:

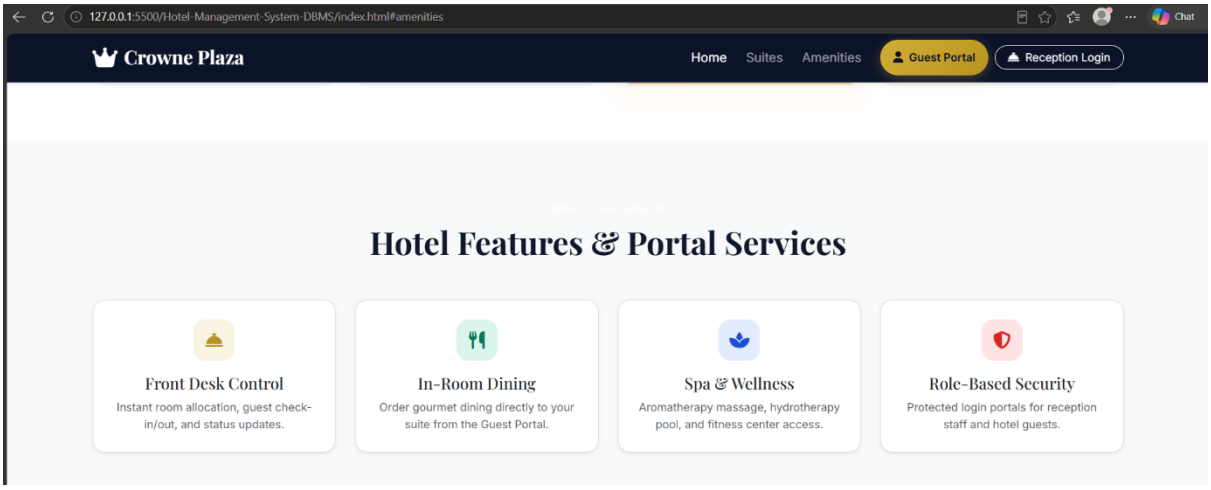

HOME:

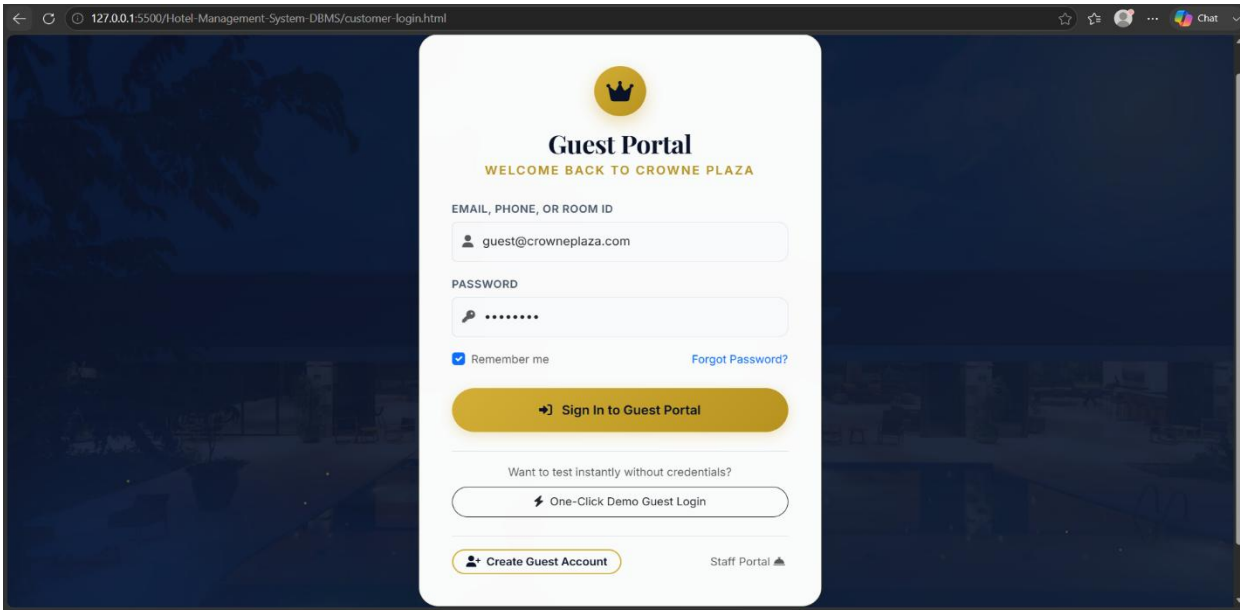

Suites availability:

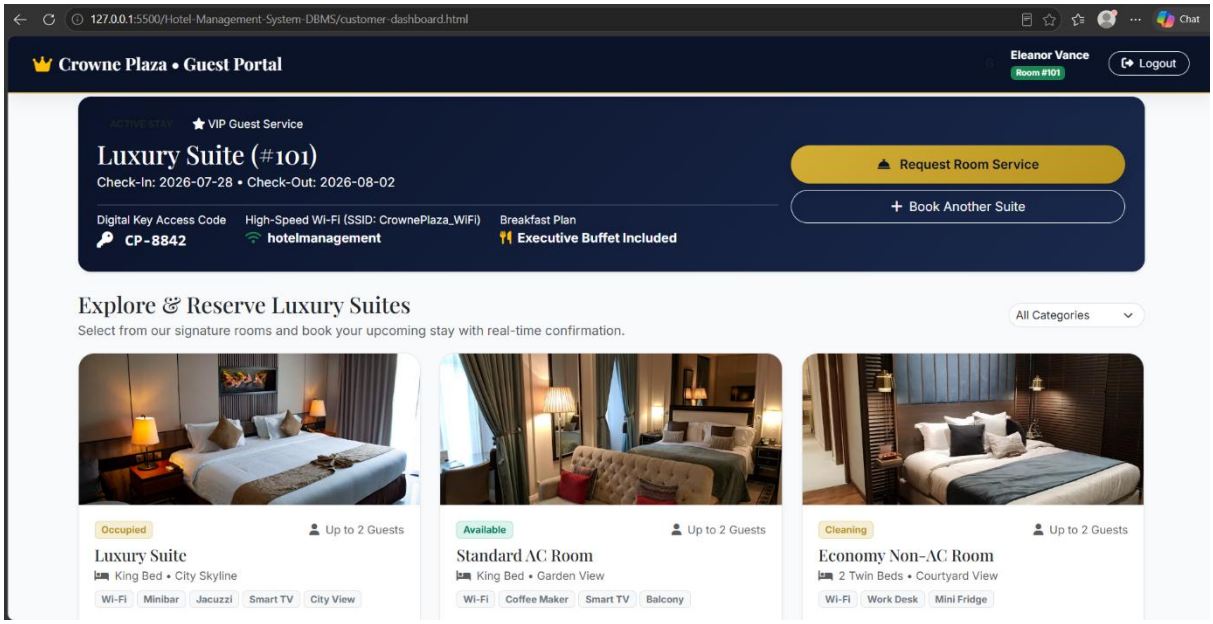

Amenities:

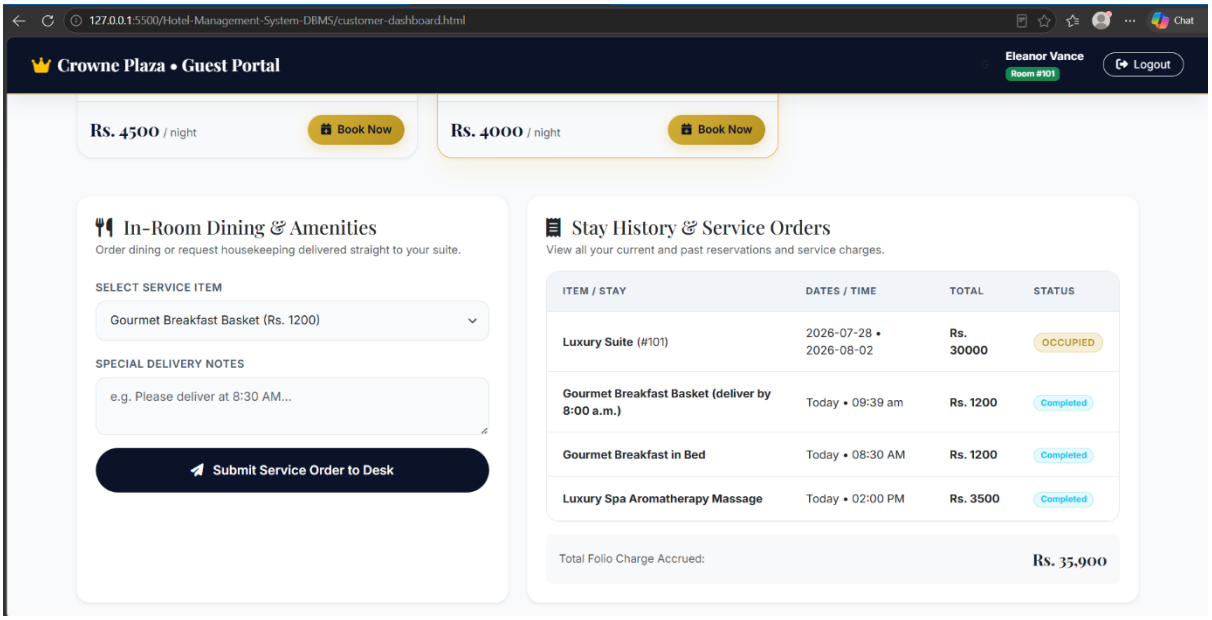

Guest login page:

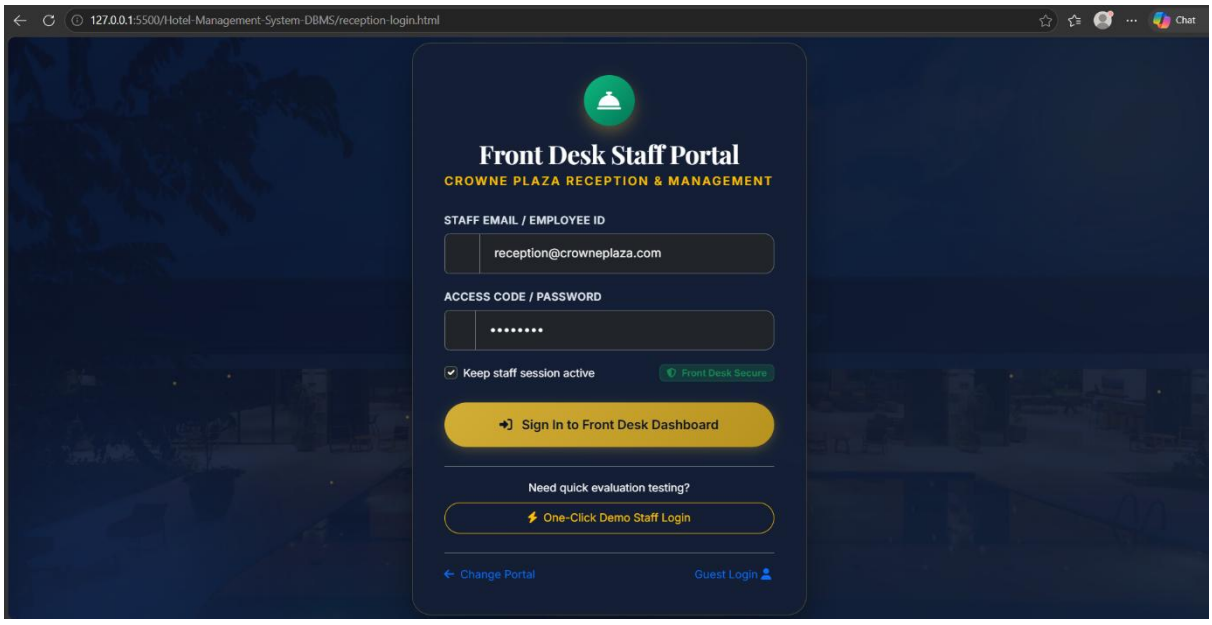

Guest portal:

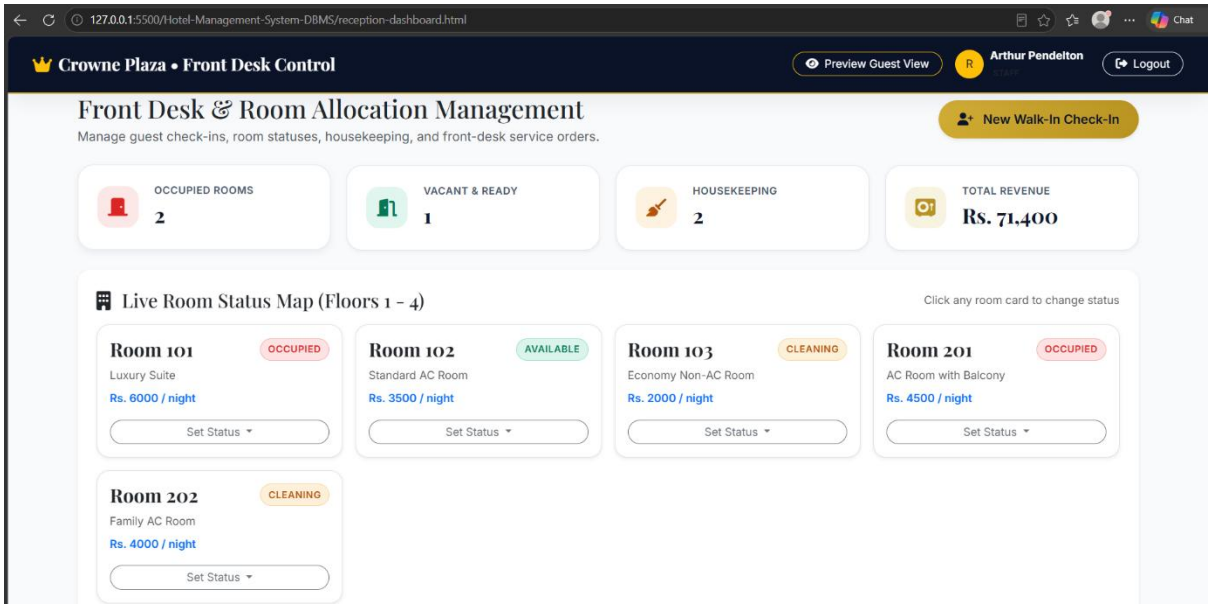

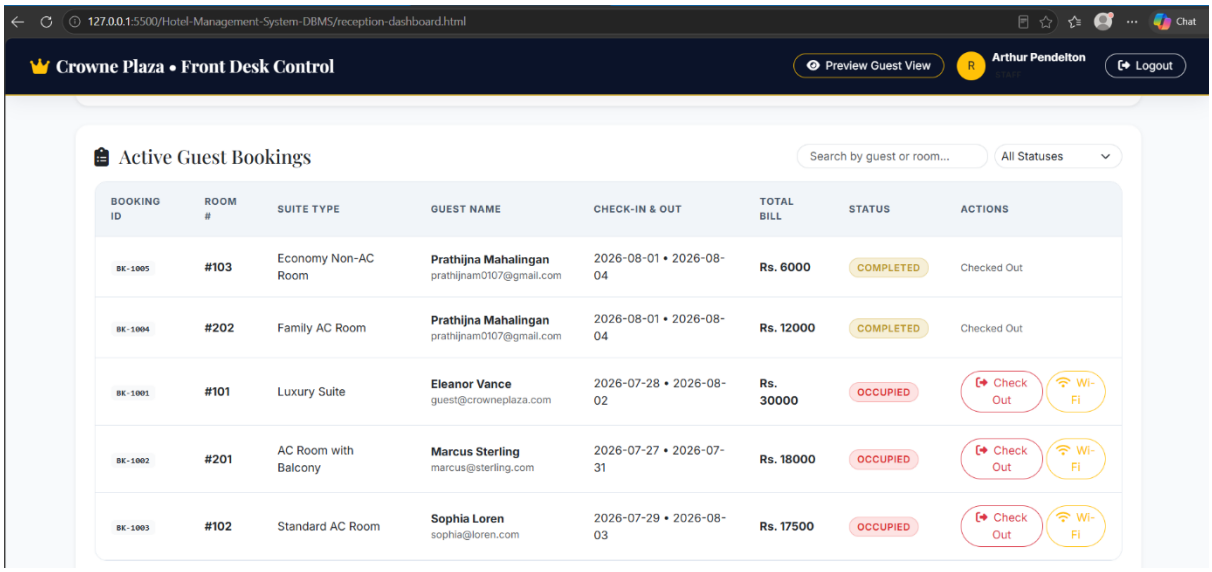

Front desk/ Reception login page:
